

Staying Proactive on the Farm: COVID-19

Coronavirus disease 2019 (COVID-19) is a respiratory illness and may be deadly for older people and those with weakened immune systems. Below are practices that can be implemented to stay healthy and stop the spread.

CLEANING AND SANITIZING FACILITY/FARM

- Disinfect high-contact surfaces, including machinery/equipment, door knobs/handles, tools, breakrooms, and offices.
- Provide ample sanitation stations and supplies

FARM PERSONNEL SANITATION

- Wash hands frequently with soap and warm water for at least 20 seconds
- Maintain good personal hygiene
- Avoid touching eyes, nose and mouth
- Avoid bringing any visitors with you to work and report any visitors to management

FARM PERSONNEL HEALTH

Be cognizant of the following symptoms and be mindful of your health and the health of those around you.

Symptoms of the virus include: fever, cough and shortness of breath

- If you are not feeling well, contact a healthcare provider
 - If tested positive, follow the recommendations of your doctor
- If you have traveled, monitor your health for any signs or symptoms of possible illness, including a fever
- Avoid close contact with anyone who is showing signs of illness and limit person-to-person contact
- Maintain social distance of at least 6 feet
