The above manufacturer requests permission to deliver bulk pesticides and the above dealer request permission to install facilities for dispensing the pesticide to Arkansas licensed applicators at certain locations, as are hereinafter designated, subject to the following conditions:

1. All products will be registered with the Pesticide Section of the Arkansas Department of Agriculture by the manufacturer.
2. Bulk License required for 500 gallon or larger containers.

3. All containers to be dispensed from will be plainly marked by the dealer with paint or stenciling in large letters showing the name and address of the dealer applicant, and a phrase similar to “Warning-Contains Pesticides.”
4. All containers will bear a complete label, as registered, for the product therein, including the manufacturer’s name and address as provided by the manufacturer.
5. All containers must contain suitable sample points to permit sampling by personnel of the Arkansas Department of Agriculture. Samples must be accepted without reservation as being representative of the material therein and described on the label attached.
6. All containers are charged or recharged, the filling inlet will be sealed by the dealer in such a manner as to prevent tampering with the contents.
7. The dealer must meet EPA established guidelines for handling bulk pesticides and in accordance with all Department of Transportation (DOT) regulations.
8. The dealer must make adequate provision for handling to prevent contamination or injury to persons, livestock, and crops.
9. The dealer and person in charge as indicated herein will be responsible for overall operation of the location.
10. Containers, prior to being used for a different pesticide, will be thoroughly cleaned by the dealer and relabeled.
