

H. 7. 21

Audubon, To whom it may concern,

I am Jewel Harris

563 N. New York Ave.

Paraway N. 92419

Phone 870-482-3754,

I received your letter, last  
Week, I am a 73 disable Widow

& I try to plant a garden to  
have food to put up, frozen or

Canned to help me through the  
winter, 3 years I lost all my

garden, flowers & shrubs from  
bound up. Then 2 years lost

garden flowers & shrubs from  
Di Lambia, last ~~year~~ year I had

48 Tomatoes plants, putting on  
Tomatoes, 6 rows of peas

yellow squash, green squash  
okra, green peppers, hot peppers

The Di Lambia hit June 23<sup>rd</sup> lost  
every thing in the garden &

and my plants in the yard

We already know, Roundup causes  
Cancer. With Roundup mixed  
with dicamba, what are we  
looking at? We do not need  
any more bad chemicals  
killing us off. They need to  
do their part to stop the  
drift. I was told by the  
plant board, this dicamba can  
drift for 30 to 50 ~~miles~~ miles  
please, help us stop this  
now.

Thank you  
Jewel Harris

To Who it May Concern  
I'm Malinda Ruiz I'm  
a neighbor to Ms Harris and  
the Dicamba destroyed part  
of my tomatoes + green beans  
and most of my flowers  
and I have ~~asthma~~ asthma  
every time the man sprayed  
the fields I can smell it  
and it messes up my breathing  
I also have Lupus so this  
chemical could be really dangerous  
to people that have health  
issues, I would appreciate  
it if you will discontinue  
use of this chemical. My  
health and the health and  
welfare of other people matters!!!  
I would be grateful that you  
will stop spraying this  
chemical.

So people can plant their  
gardens, and live a full  
life.

Sincerely yours,

Malinda Ruiz

To whom it may Concern

I Tommy Schooffield planted a garden last year well whoever sprayed I lost my apple trees, tomato plants Squash, purple hull peas, oakra, cucumbers Peppers. I called plant board and they came out and took a look said it looked like dicamba. So we all wish that this chemical could be put to a stop people ~~plants~~ things for a reason To make ~~plants~~ A Living. So put a stop to it.

Thanks

To Whom it may concern,

I am a family member of Jewel Banks I also helped with the garden every year everytime the fields are sprayed we loose ~~loose~~ the garden if not all. So if there can be a stop to the dicamba it needs to be. We are tired of loosing everything that we work hard on.

Thank you

Jane Schoen

STOP THE  
DICAMBA!!
