Arkansas State Plant Board
1 Natural Resources Drive
Little Rock, AR 72205

Dear Arkansas State Plant Board Members:

Please do not amend the rules for Dicamba use in Arkansas to allow for an extended period of use by farmers and applicators. Extending the use into mid-summer only exacerbates the potential for problems and does not resolve concerns with regard to off-target impacts.

As a resident of northeast Arkansas, I wish to see this herbicide banned altogether, as other states have seen fit to do. I believe the industries impacted by this rule are resourceful and resilient enough to find suitable alternatives.

Thank you,

Pam Alexander
