Arkansas state plant board

Dicamba Banning

Panel,

On behave of Brannan farms in northeast Arkansas, we believe dicamba needs to be banned. Our fields of cotton and soybeans have been drastically damaged. We have lost thousands of dollars since the dicamba was first used. Our neighbor farms spray in windy conditions which violate the guidelines given by the board.

Our garden has been destroyed every year. The plants can not survive with this type of spray in the air. As with other families in the area we put a lot of effort into the garden to have fresh vegetables on the table. We have lost trees, fruit trees and flowers in our yard due to the spraying.

The spraying of dicamba should be banned because it destroys innocent peoples crops, gardens and trees because of misuse. We are against the third party request and to keep restrictions now in place or make unusable altogether.

Thank you

Tim Brannan
