Arkansas Department of Agriculture and University of Arkansas Monticello Announce Foresters for the Future Scholarship Recipient for 2022

LITTLE ROCK, AR – The Arkansas Department of Agriculture’s Forestry Division and the University of Arkansas at Monticello (UAM) have named Pryce Jones as the recipient of the 2022 Foresters for the Future Scholarship. The scholarship provides \$4,000 per semester, for four years, to an incoming freshman pursuing a forestry degree at UAM’s College of Forestry, Agriculture, and Natural Resources.

Pryce Jones, from Arlington, Tennessee, owns and operates a lawn and landscape business in his hometown and hopes to restore his family’s forestland in Fordyce, Arkansas. This restoration project, along with his passion for the outdoors, led Jones to pursue a Forestry degree.

“My grandparents have a little over 900 acres of timberland,” Pryce said. “I believe that coming to UAM will benefit me the most in learning how to manage that land and bring it back to its former glory, while also getting a great education.”

Jones aims to build a career in timber management and looks forward to getting involved in forestry activities on campus.

“I love the forestry program here. It’s personable and close and everybody really knows everybody,” he said. “I’m anxious to get involved in as many different clubs and things that will benefit my future.”

“Pryce has demonstrated a great work ethic, as exemplified by his building a substantial lawn and landscaping business while still in high school. He also has a deep commitment to sustainable forest management and family ties to southern Arkansas. I’m pleased that this scholarship provides financial assistance and work experience for an up-and-coming young forester like Pryce,” said Dr. Michael Blazier, dean of the UAM College of Forestry, Agriculture, and Natural Resources.

Foresters for the Future Scholarship recipients will participate in a paid internship exploring the various sections of the Forestry Division annually through their college career. The internship will allow them to experience the many career paths within forestry and strengthen their skill set before they enter their respective field.

“Our goal with the Foresters for the Future Scholarship is to attract young leaders to forestry careers,” said State Forester Joe Fox. “Pryce Jones has begun his journey as a future leader, and we are excited to provide him this opportunity with UAM.”

The scholarship program was established by Act 399 of the 2021 Regular Session of the Arkansas General Assembly. The underlying legislation, House Bill 1389, was sponsored by Representative Ken Bragg and Senator Ben Gilmore and was signed into law by Governor Hutchinson on March 17, 2021.

The Arkansas Department of Agriculture is dedicated to the development and implementation of policies and programs for Arkansas agriculture and forestry to keep its farmers and ranchers competitive in national and international markets while ensuring safe food, fiber, and forest products for the citizens of the state and nation. Visit agriculture.arkansas.gov/. The Arkansas Department of Agriculture offers its programs to all eligible persons regardless of race, color, national origin, sex, age, or disability and is an Equal Opportunity Employer.

The College of Forestry, Agriculture and Natural Resources, and the Arkansas Forest Resources Center, a University of Arkansas System Center of Excellence, brings together interdisciplinary expertise through a partnership between the University of Arkansas at Monticello and the University of Arkansas System Division of Agriculture. The College and Center are headquartered at the University of Arkansas at Monticello campus, but their programs range statewide with the mission of developing and delivering teaching, research, and extension programs that enhance and ensure the sustainability and productivity of forest-based natural resources and agricultural systems. Academic programs are delivered by the College of Forestry, Agriculture, and Natural Resources through the University of Arkansas at Monticello. Through the University of Arkansas System Division of Agriculture, research is administered by the Arkansas Agricultural Experiment Station, and extension and outreach activities are coordinated by the Arkansas Cooperative Extension Service.

The University of Arkansas at Monticello offers all of their programs to all eligible persons without regard to race, color, sex, gender identity, sexual orientation, national origin, religion, age, disability, marital or veteran status, genetic information, or any other legally protected status, and are Affirmative Action/Equal Opportunity Employers.
