Please Note:

The above USDA LPGMN price report is reflective of the majority of classes and grades of livestock offered for sale. There may be instances where some sales do not fit within reporting guidelines and therefore will not be included in the report. Prices are reported on an FOB basis, unless otherwise noted.

Explanatory Notes:

Stage (Sheep/Goats) - Represents estimated lambing/kidding period (O = open; E = Exposed; B = Bred; FALL = September to November; WIN = December to February; SPR = March to May; SUM = June to August)

Age - Numerical representation of age in years.

This Week's Chicken Feature Highlights

Market indicators are about unchanged, incentives to purchase drops slightly, the number of poultry in retail remains constant. Whole birds as a category increase and at a decent price level, bagged roasters and Cornish offers increase. B/S breast attempts to keep movement up, tenders try a short hop up in values. Split breast is a good purchase in bulk packs. Drums and thighs in both packs move upward. IQF b/s breast and wings test their popularity with a price increase. Prepared food offers are down entering Mother's Day weekend, fingers foods raise prices. Specialty and organics chicken pushes white meat items That happy sound heard is children released from school for the summer Mother's Day will surely leave a cold kitchen this weekend, and vacation time is around the corner.

All report information gathered from publicly available sources including store circulars, newspaper ads, and retailer websites.

^{1/} Feature Rate: the amount of sampled stores advertising any reported chicken item during the current week, expressed as a percentage of the total sample. ^{2/} Activity Index: a measure of the absolute frequency of feature activity equal to the total number of stores for each advertised chicken item (e.g., a retailer with 100 outlets featuring a product). ^{3/} Stores/Avg: the total number of advertising outlets and the weighted average price weighted by the respective number of outlets. ^{4/} Special Rate: the percentage of sampled stores with a no-price promotion (e.g., buy 1, get 1 free, etc.)

SHELL EGG and EGG PRODUCTS FEATURING

Regular shell egg feature rate is higher this week. This week's weighted average price of USDA Grade A Large or better eggs is trending marginally higher. In this week's ad cycle, special rates are higher. Advertisements for Extra Large and Medium eggs are hard to find this week. Feature activity for specialty shell eggs is higher. Promotional activity for liquid egg products is lower.

Click Page for Complete Report

All report information gathered from publicly available sources including store circulars, newspaper ads, and supermarket websites.

1/: FEATURE RATE: the amount of sampled stores advertising any consumer grade of shell eggs during the current week, expressed as a percentage of the total sample. 2/: ACTIVITY INDEX: a measure of the absolute frequency of feature activity equal to the total number of stores for each advertised consumer grade of shell egg. (e.g., a retailer featuring XL and LG eggs in 100 stores would have an activity index of 200.) 3/: STORES/AVG: the total number of advertising outlets and the weighted average price weighted by the respective number of outlets. 4/: SPECIAL RATE: the percentage of sampled stores with a no-price promotion (e.g., buy 1, get 1 free, etc.)

USDA National Retail Report - Turkey
Advertised Prices for Turkey to Consumers at Major Retail Supermarket Outlets during the period of 05/03 thru 05/09.
(prices in dollars per pound fresh unless otherwise noted; does not reflect all turkey items available in the marketplace)

Fri. May 03, 2024

NATIONAL SUMMARY table with columns: THIS WEEK, LAST WEEK, LAST YEAR. Rows include Feature Rate, Special Rate, Activity Index, and various turkey categories like Whole Birds, Parts, and Ground Turkey.

Turkey feature activity shows a modest decline. Whole birds make a limited appearance in the Northeastern region. Frozen bone-in breasts almost double in offerings however remain on the light side, following typical post-Easter patterns; values trend lower. Cutlets return to the mix. Marinated tenders decline in both offers and price. Dark parts are a little easier to find in a couple of regions and most of that attention centers on fresh drums and wings. Grinds are less active with 85% lean accounting for nearly seventy percent of those ads. Most conventional ground items are better valued, except for 85% lean. Deli activity loses momentum with a decrease in service and self-service promotions. Turkey thin slicing and shaving meats are viewed at lower price points.

All report information gathered from publicly available sources including store circulars, newspaper ads, and retailer websites.
1/ Feature Rate: the amount of sampled stores advertising any reported turkey item during the current week, expressed as a percentage of the total sample.
2/ Activity Index: a measure of the absolute frequency of feature activity equal to the total number of stores for each advertised turkey item...
3/ Stores/Avg: the total number of advertising outlets and the weighted average price weighted by the respective number of outlets.
4/ Special Rate: the percentage of sampled stores with a no-price promotion...
5/ Specialty: products produced from birds raised on an all vegetable diet without antibiotics and minimally processed.

A Fiesta of Deals

Retailers enthusiastically prepared for the Cinco de Mayo rush this week. Avocados, mangos, limes, sweet onions, cilantro, jalapenos, Roma tomatoes, watermelons, and cucumbers were highly featured and were often found together in promotional Cinco de Mayo sections. Conventional and organic strawberries were heavily advertised ahead of Mother's Day and just in time for the Kentucky Derby. New crop California cherries made their first appearance, heralding the beginning of tree fruit season. Georgia blueberries also arrived in stores this week, another indicator of summer around the corner.

Total ad numbers this week were 265,171 a 10% decrease from last week's total of 294,443. The total for the same week last year was 5% lower at 252,964. The total number of ads broken out by commodity groups: fruit 136,155 (51% of all ads), onions and potatoes 22,074 (8%), vegetables 100,254 (38%), herbs 6,396 (3%), ornamentals 2,231, and hemp 4,457 (2%). The number of ads for organic produce was 26,836, 10% of total ads.

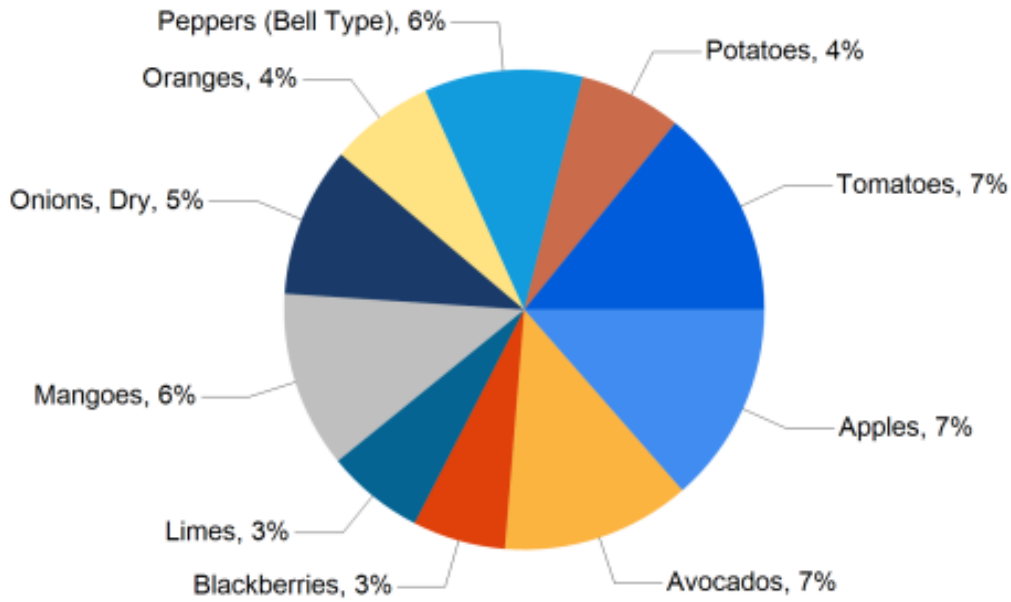

The following are the prices of major advertised items (3,000 plus ads) this week, compared to the same week last year. There were no significant increases in price for fruit this week. Significant decreases included only limes (ea.) at 17%. Significant changes in price for potatoes and onions this week included only a 12% increase for yellow sweet onions (per lb.). Significant increases in price for vegetables this week included green onions at 39%, cilantro at 23%, jalapeno peppers at 21%, Roma tomatoes at 19%, and zucchini at 10%. Significant decreases included long seedless cucumbers at 18% and orange bell peppers (ea.) at 10%.

Livestock, Dairy, and Poultry Outlook: April 2024

Total Red Meat and Poultry Production Projected To Grow Again in 2024 After Last Year's Decline

Total red meat and poultry production is forecast to increase 0.84 percent in 2024. This follows a year of decreased production in 2023, the first since 2014. Increased production of pork, broilers, and turkey in 2023 were all offset by a large decline in beef production. Looking to 2024, beef production is again forecast to fall due to tightening cattle supplies, with turkey production expected to be slightly lower as well. However, these decreases are anticipated to be more than offset by higher pork and broiler production, raising total red meat and poultry production by nearly 1 percent.

Year-over-year changes in red meat and poultry production

Note: Change in total red meat and poultry also includes veal, lamb, and other chicken production.
Source: USDA, Economic Research Service calculations using USDA, *World Agricultural Supply and Demand Estimates*.

[Click Page for Complete Report](#)

Summary

Beef/Cattle: A temporal shift of cattle slaughter from early to late 2024, as well as higher expected fed cattle weights, helped boost the beef production forecast by 130 million pounds to 26.455 billion pounds, though still down 2 percent from last year. Fed cattle prices are raised about \$2 from last month to \$185.00, about 5 percent above prices in 2023. U.S. beef exports in February were 244 million pounds, almost 3 percent above same-period shipments last year and higher than expectations. This prompted a 20-million-pound increase of the first-quarter export forecast to 740 million pounds, 5 percent less than a year ago. The beef import forecast is unchanged from last month.

Dairy: The 2024 milk production forecast has been lowered to 226.3 (-1.0) billion pounds due to slower anticipated milk yield per cow, with cow numbers remaining unchanged. Dairy product price forecasts show mixed changes from last month's forecasts with Cheddar cheese at \$1.620 (-9.0 cents), dry whey at \$0.425 (-2.5 cents), butter at \$2.925 (+12.5 cents), and nonfat dry milk (NDM) at \$1.180 (-3.0 cents) per pound. The Class III milk forecast is now \$16.20 per hundredweight (cwt), down \$0.95 due to lower cheese and dry whey prices. Despite lower NDM price forecast, the Class IV price forecast has risen to \$20.40 per cwt, up \$0.30 due to higher butter prices. The all-milk price for 2024 is projected at \$20.90 per cwt, down \$0.35 from the previous month's forecast.

Pork/Hogs: The December *Hogs and Pigs* report showed 1 percent more market hogs than a year ago and just 2 percent fewer breeding animals. Adjusting quarterly pork production forecasts to information in the report resulted in a 2024 production increase of 180 million pounds, with an increase of more than \$4 per cwt in average 2024 hog prices. Strong February pork exports prompted the addition of 210 million pounds to the 2024 export forecast. U.S. pork exports in 2024 are expected to be 7.3 billion pounds, almost 8 percent higher than last year.

Poultry/Eggs: Broiler production in 2024 is adjusted up on strong average weights and hatchery data, as well as on favorable feed prices. Projected broiler exports are adjusted down on recent data, while projected wholesale broiler prices are adjusted up on recent data and strong demand. Projected table egg production in 2024 is adjusted down based on recent losses due to highly pathogenic avian influenza (HPAI). Projected 2024 egg prices are adjusted up on recent data and lower supply expectations. Egg and egg product exports were adjusted up slightly for 2024 on recent data. Estimated turkey production was adjusted up slightly in the first quarter of 2024 on stronger-than-previously-expected February production. Projected turkey exports are unchanged, while projected imports are lowered on decreased shipments from Chile. Projected turkey prices are adjusted down for 2024 on recent data and weaker demand.

Cooperating with the Arkansas Department of Agriculture

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at <https://www.nass.usda.gov/ar> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the county extension agents who responded to this survey.

Week Ending: May 5, 2024

Released: May 6, 2024

According to the National Agricultural Statistics Service in Arkansas, there were 3.6 days suitable for fieldwork for the **week ending Sunday, May 5, 2024**. Topsoil moisture supplies were 1 percent very short, 8 percent short, 53 percent adequate, and 38 percent surplus. Subsoil moisture supplies were 2 percent very short, 10 percent short, 51 percent adequate, and 37 percent surplus.

Arkansas Subsoil Moisture Map for the week of April 22 – April 28, 2024

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.

Rice Areas in Drought

Reflects **May 7, 2024**
U.S. Drought Monitor data

Approximately **10%** of rice production is within an area experiencing drought.

Major and minor agricultural areas are delineated using NASS 2017 Census of Agriculture data. Drought areas are identified using the U.S. Drought Monitor product.

Peanut Areas in Drought

Reflects **May 7, 2024**
U.S. Drought Monitor data

*This product was prepared by the
USDA Office of the Chief Economist (OCE)
World Agricultural Outlook Board (WAOB)*

Approximately **1%** of peanut production is within an area experiencing drought.

Major and minor agricultural areas are delineated using NASS 2017 Census of Agriculture data. Drought areas are identified using the U.S. Drought Monitor product.
